TPD Recognized for Supporting Professional Engineers

The Professional Engineers in Private Practice (PEPP), part of the Pennsylvania Society of Professional Engineers (PSPE), selected Traffic Planning and Design, Inc. (TPD) as the 2008 Professional Development Award Winner. The PEPP Professional Development Award is presented to employers who exhibit exceptional career development initiatives and employment practices that advance the engineering profession.

Because of TPD's support of staff obtaining Professional Engineering licenses, along with their aggressive Professional Development Program and Tuition Reimbursement Policy, PEPP recognized TPD as an exemplary organization which strives to maintain a highly trained staff of designers and planners. TPD's Professional Development Program has succeeded in building staff's technical knowledge and skills which in turn continuously improves the quality of TPD's roadway and bridge designs and transportation studies.

Many staff members achieve Professional Development goals with active membership in professional societies, such as those sponsoring National Engineers' Week, through which they build technical knowledge and develop critical leadership skills.

Since 1989, TPD has continually demonstrated a commitment to providing exceptional staff benefits, including financial support and flexible schedules for Professional Development pursuits. From the newest office in downtown Pittsburgh, offices in Pottstown, Harrisburg, and the Lehigh Valley in PA, and a New Jersey office on the Camden Waterfront, TPD's 135 members, including 34 licensed Professional Engineers, specialize in providing transportation planning, highway and traffic signal design, bridge design and inspection, environmental permitting, and construction management and inspection services to municipal, state (DOT), and private clients. Visit them on the web at www.TrafficPD.com.
